‘Learning Through Play’

Supports children to:

- Explore the environment
- Develop curiosity
- Understand similarities and differences

Nature Detective

This week we’re learning about the world! Understanding the world involves guiding children to make sense of their physical world and their community. The frequency and range of children’s personal experiences increases their knowledge and sense of the world around them – from visiting parks, libraries and museums to meeting important members of society such as police officers, nurses and firefighters.

Explore outdoor spaces or sensory trays with natural items e.g. leaves, soil, stones etc. Talk about changes and textures.

Use objects e.g. binoculars, magnifying glasses etc.

Extend: Take photos of findings or encourage drawing
